INTRODUCTION

Linear Vista was established in 1999 in Malaysia after successfully winning the job for the new Airport terminals in Cambodia. Since then we have been working to establish ourselves as the go to Design practice for niche and challenging projects. A medium sized office, we have a reputation for managing unique designs and delivering them in a timely and cost effective manner. Current work includes the rebranding and expansion of Village Grocers and its Gourmet Market concept, all Architectural and Bridge work for the River of Life Project in Kuala Lumpur, upgrading of Mid Valley Mega Mall for IGB and new branding F&B for Brussels Beer café and San Francisco Coffee. We are not afraid to develop new ideas and use new materials while always paying particular attention to detail to ensure effective buildability and long term Durability.
